Free SSL Seminar

Solid State Logic invite you to a free SSL seminar at Webster University in St. Louis.

SSL Studio Workshops bring together like minded individuals to share expertise and strengthen local production communities.

The St. Louis event will be hosted by Solid State Logic's **Fadi Hayek** who will be presenting a seminar discussing workflow and the factors that affect your studio environment. He will examine and discuss various studio setups to give you insight on how your workflow can be more productive, feel more creative, and how you can make better music! Topics Include:

- **Music production techniques, Then and Now**: Changes in the way we make and record music today.
- **SuperAnalogue™ technology**: Only SSL has it and why you need to know about it.
- **The history of DAWs**: Understand the technology advances, workflow challenges and how they impact your sound.
- **Why doesn't my mix sound right?**: Hear a direct comparison of an in the box vs. outside the box mix.

SSL will be showing the **AWS** and **Matrix** consoles along with **XLogic SuperAnalogue™** modular analogue processing, **Nucleus, XLogic I/O, X-Desk**, and **Duende plug-ins**.

This event is free to attend but numbers are limited.
To reserve your place please **RSVP** using the contact details below.
